## **Test Report**

Prepared for: FLYHT Aerospace Solutions Ltd.

Model: AFIRS 228S Automated Flight Information Reporting System

Description: Dual Channel Satcom System that incorporates simultaneous operation of embedded radios.

Serial Number: 5012

FCC ID: 2ABRJ-228S

To

FCC Part 25

Date of Issue: October 2, 2015

On the behalf of the applicant: FLYHT Aerospace Solutions Ltd.

300E, 1144 – 29 Ave. NE Calgary, Alberta T2E 7P1

Attention of: Derek Graham, Chief Technical Officer

Ph: (403)291-7438

E-Mail: dgraham@flyht.com

All results contained herein relate only to the sample tested

# **Test Report Revision History**

Revision	Date	Revised By	Reason for Revision
1.0	9/3/15	Alex Macon	Original Document
2.0	9/23/15	Amanda Reed	Removed references to notch and high-pass filters on page 6. Updated contact information & address on cover page
3.0	9/29/15	Diana Williams	Added second FCC ID.
4.0	10/2/15	Diana Williams	Corrected FCC ID and Description.

## **Table of Contents**

<u>Description</u>	<u>Page</u>
Standard Test Conditions and Engineering Practices	5
Emissions Limitations for Mobile Earth Stations	6
Emissions Limits for Mobile Earth Stations	8
Test Equipment Utilized	15

### ILAC / A2LA

Compliance Testing, LLC, has been accredited in accordance with the recognized International Standard ISO/IEC 17025:2005. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer joint ISO-ILAC-IAF Communiqué dated January 2009).

The tests results contained within this test report all fall within our scope of accreditation, unless noted in the table below.

Please refer to <a href="http://www.compliancetesting.com/labscope.html">http://www.compliancetesting.com/labscope.html</a> for current scope of accreditation.

Testing Certificate Number: 2152.01

FCC Site Reg. #349717

IC Site Reg. #2044A-2

Non-accredited tests contained in this report:

N/A

### **Standard Test Conditions and Engineering Practices**

Unless otherwise indicated, the procedures contained in ANSI C63.4-2009 were observed during testing.

Prior to testing, the EUT was tuned up in accordance with the manufacturer's alignment procedures. All external gain controls were maintained at the position of maximum and/or optimum gain throughout the testing.

Measurement results, unless otherwise noted, are worst case measurement.

Unless otherwise indicated in the specific measurement results, the ambient temperature was maintained within the range of 10° to 40°C (50° to 104°F) and the relative humidity levels were in the range of 10% to 90%.

Environmental Conditions					
Temperature (°C)	Humidity (%)	Pressure (mbar)			
23.2 – 25.1	32.4 – 41.2	967.5 – 971.2			

#### **Test and Measurement Data**

All tests and measurement data shown were performed in accordance with FCC Rules and Regulations, Volume II; Part 2 and the following individual Parts: FCC Part 25 Satellite Communications.

Prior to testing the EUT was tuned up in accordance with the manufacturer's alignment procedures. All external gain controls were maintained at the position of maximum and/or optimum gain throughout the testing.

Measurement results, unless otherwise noted, are worst case measurements.

### **EUT Description**

Model: AFIRS 228S Automated Flight Information Reporting System

**Description:** Dual Channel Satcom System that incorporates simultaneous operation of embedded radios.

SN: 5012 Firmware: N/A

#### **Additional Information:**

Dual channel satcom system used in aircrafts. This report is intended to be a C2PC in order to remove the colocation restriction on this device and allow simultaneous operation of embedded radios.

#### **EUT Operation during Tests**

EUT is placed into a modulated transmit mode which the manufacturer supplied. Both Modems were synced and transmitting at full power during testing.

Accessories: None

Cables: None

Modifications: None

**Emissions Limitations for Mobile Earth Stations** 

Engineer: Alex Macon Test Date: 8/31/15

#### **Test Procedure**

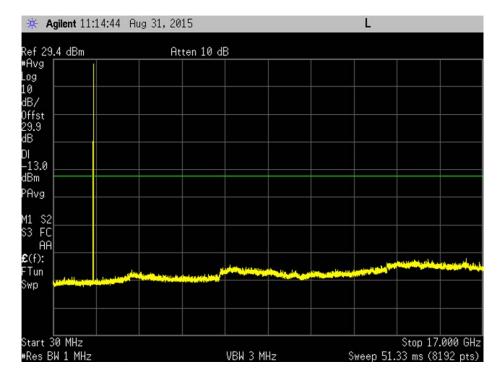

The EUT was connected directly to a spectrum analyzer and the conducted spurious emissions were measured to ensure that the EUT met the requirements specified. Only the worst case emission at each frequency was reported. These losses in addition to cable losses were input into the analyzer as a reference level offset to ensure accurate measurements were obtained. Section 25.202(f)(3)

#### **Test Setup**

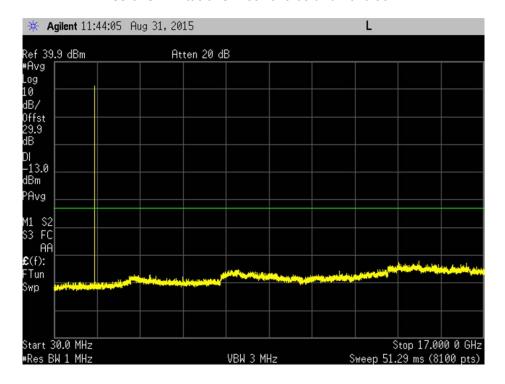

Tuned Frequency (MHz)	Result	Comments	
1616.02	Pass	See Plots	
1620.98	Pass	See Plots	
1625.98	Pass	See Plots	

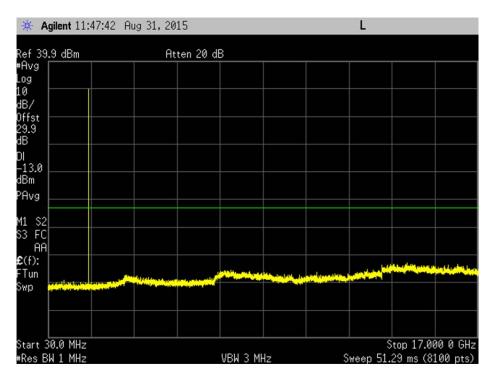

### Emissions Limitations Plot 1616.02 and 1616.31 MHz

### Emissions Limitations Plot 1620.68 and 1620.98 MHz

#### Emissions Limitations Plot 1625.68 and 1625.98 MHz

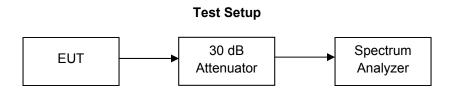

**Emissions Limits for Mobile Earth Stations** 

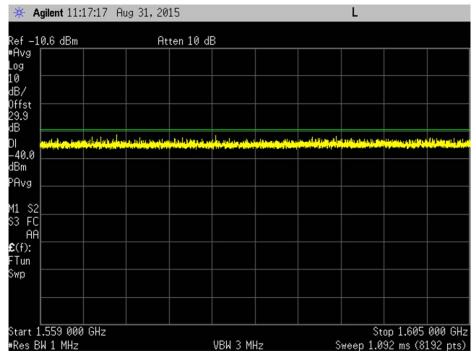

Engineer: Alex Macon Test Date: 8/31/15

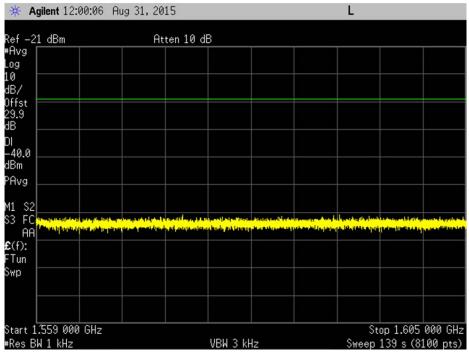

#### **Test Procedure**

The EUT was connected directly to a spectrum analyzer to verify that the EUT met the requirements for emission limits. Attenuator, cable losses and antenna gain were input into the analyzer as a reference level offset and a correction factor to ensure accurate measurements were obtained.

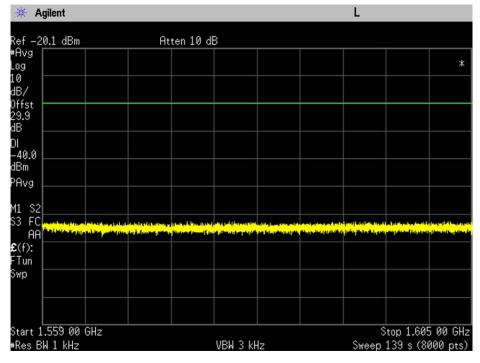

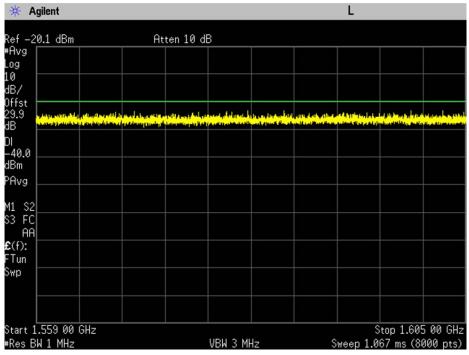

### 25.216(c) low channels

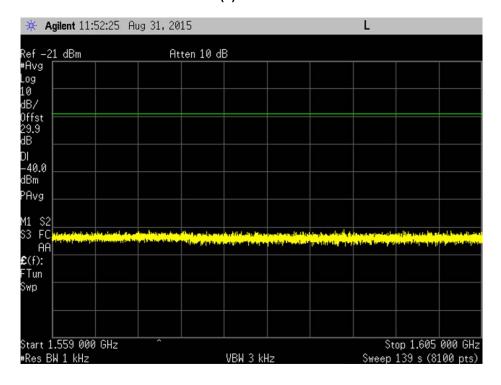

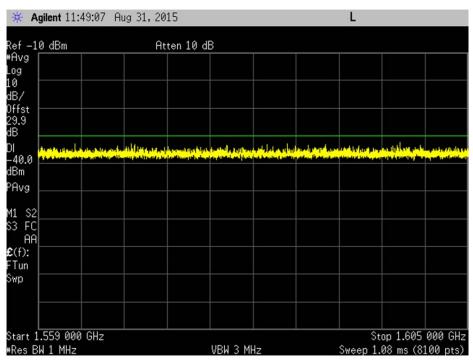

### 25.216(c) mid channels

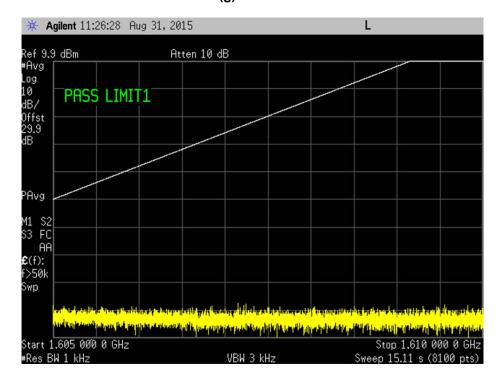

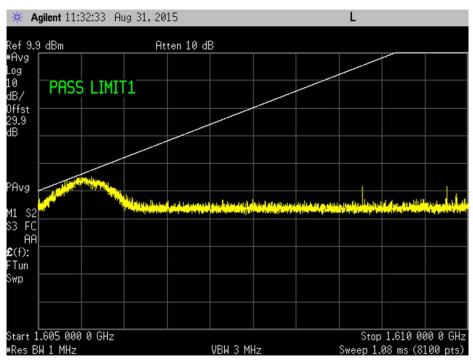

### 25.216(c) mid channels

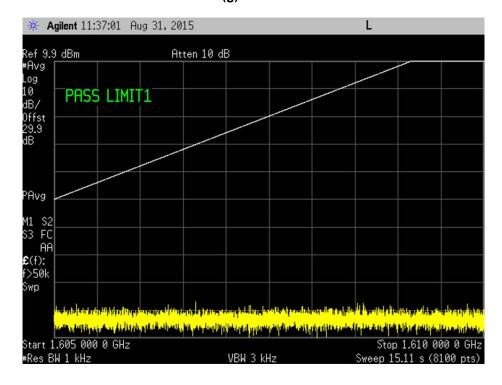

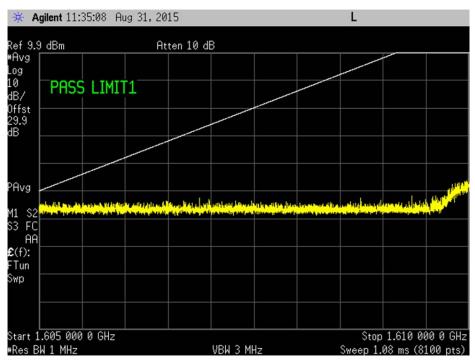

### 25.216(g) Low channels

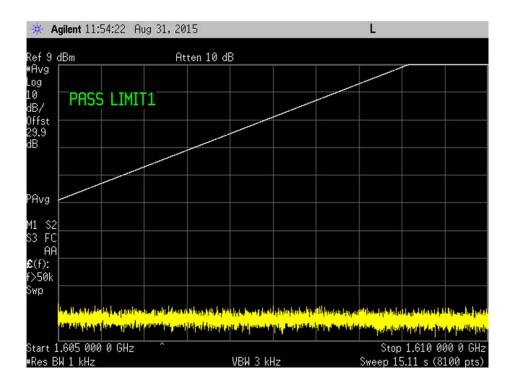

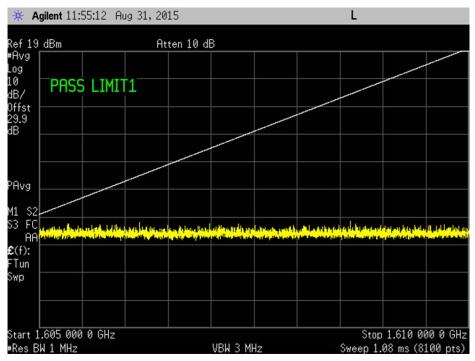

### 25.216(g) Mid channels

### 25.216(g) High channels

# **Test Equipment Utilized**

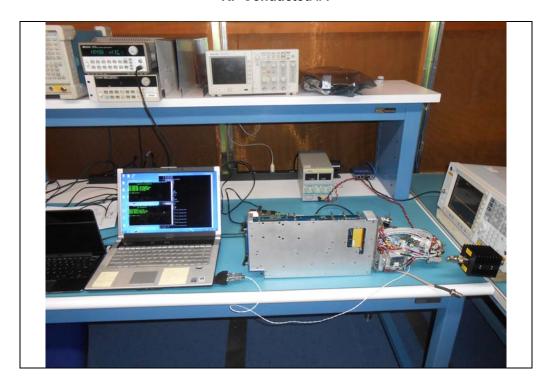

Description	Manufacturer	Model #	CT Asset #	Last Cal Date	Cal Due Date
Function Generator	HP	33120A	i00118	Verified on: 8/31/15	
Humidity / Temp Meter	Newport	IBTHX-W-5	i00282	4/1/15	4/1/16
Voltmeter	Fluke	87111	i00319	2/20/15	2/20/16
Power Supply	Yihua	PS 3010D	i00409	Verified on:8/31/15	
Spectrum Analyzer	Agilent	E4448A	S/N:MY46180566	12/1/2014	12/1/2016

In addition to the above listed equipment standard RF connectors and cables were utilized in the testing of the described equipment. Prior to testing these components were tested to verify proper operation.

**END OF TEST REPORT** 

# RF Conducted #1

RF Conducted #2
